		Safety toe cap made from composite material, shielding toes from impacts up to 200 Joules and compressions up to 15 kN. It is non-magnetic, non-conductive, and provides superior thermal insulation	Protective plate made from multi- layer polyester, 40% lighter than steel, yet equally resistant up to 1,100 Newtons. It is non-magnetic, insulating and hypoallergenic.	A special tanning process involving a polyurethane film application makes this genuine leather com- pletely water-resistant, offering enhanced protection.	Three-layer wear-resistant lining featuring a microchannel network for unparalleled breathability and antimicrobial properties to prevent odors and microorganism growth. STORAGE, CARE AND MAINTENANCE

• PANDA SAFETY footwear should be stored in original packaging, storage temperature should not exceed 35°C, humidity should be less than 80% and without the influence of direct sunlight.

• Sandals, shoes and boots should be cleaned after each use; dry off the shoes, not in proximity to or in direct contact with stoves or other sources of heat.

•Carry out the periodic treatment of the uppers with suitable products containing wax, grease, silicone, etc. •Avoid contact with aggressive chemicals and extreme temperatures.

• Verify the good state before each use.
